

CONTRACEPTION

An Australian Clinical Practice Handbook

FOURTH EDITION

CONTRACEPTION:
An Australian Clinical Practice Handbook
FOURTH EDITION

published by
Family Planning New South Wales
Family Planning Victoria
True Relationships and Reproductive Health

The Contraception handbook is an essential resource for all practitioners working in reproductive health. It is a clinically focused resource developed from the most up-to-date evidence and informed by leading clinicians in the field.

Published by
Family Planning New South Wales (FPNSW)
Family Planning Victoria (FPV)
True Relationships and Reproductive Health

THE FOURTH EDITION CONTAINS:

- The latest information on contraceptive eligibility for women with a broad range of pre-existing medical conditions
- Information on medical conditions including polycystic ovarian syndrome (PCOS), eating disorders, irritable bowel syndrome and endometriosis
- New chapter providing a practical overview of the contraceptive consultation
- Updated information to reflect the increasingly important role of long acting reversible contraception (LARC)
- New information about the recently available oral emergency contraception option (ulipristal acetate) and the new single-size diaphragm
- Updated guidance about switching contraceptive methods
- Current practice recommendations for combined contraceptive pill and vascular risk, missed pills, drug interactions and more.
